Part III DETAILED ACTION

*** This office action is in response to filing of the application on February 18, 2004. Claims 1-24 are pending.

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:

I. Claims 11-15 are drawn to a method of selectively removing a seed layer from a wafer using a process solution, classified in 438/747.

II. Claims 1-10, 16-21, 22-24 are drawn to a method for forming a conductive material on a wafer, classified in Class 438/584.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species of Group I or Group II, even though this requirement is traversed. Currently, there is no generic claim. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

If Group II (claims 1-10, 16-21, 22-24) is elected, Applicant is further required to elect of :

** SubGroup IIa, Claims 1-10, 16-21.

** SubGroup IIb, claims 22-24.

Currently, claim 1 is a generic claim, and will be considered together with either SubGroup IIa or SubGroup IIb. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a). Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Art Unit: 2822

Applicant is reminded that upon the cancellation of claims to a non-elected invention/species, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
